

Dear Europeans,

**Between solidarity and forced debt —
Corona is challenging the European Union!**

Governments and the Commission in the European Union are struggling for the right measures to mitigate the economic and social consequences of the Corona pandemic and to make the European Union environmentally and technologically sustainable through sustainable investment programmes. Whatever concrete measures are decided at the end, the necessary financial volume is gigantic. Consequently, the question of funding must also be answered – and this cannot be done in an empty space. Different levels of indebtedness, varying degrees of distress due to the crisis, different economic and social structures and different conceptions of what in this situation means “correctly” are the stones from which a mosaic capable of approving everyone must be designed, the solution for Europe.

What the solution might be, we want to discuss in the context of the controversy about the various financing concepts.

Each and everyone can participate and say his opinion, orally or in writing. The conference language is German. There will be a simultaneous translation into English, French and Polish.

You are welcome to log in!
